To Whom It May Concern

Subject: Reference for Komtel Project Engineering, contractor of the “**HPP Deçan Valley Cascade Grid Connection at SS 110kV/35kV Deçan**”

This is to confirm that Komtel Project Engineering, Prishtina, have successfully implemented the project “**HPP Deçan Valley Cascade Grid Connection at SS 110kV/35kV Deçan** during the period October 2013 – October 2015.

The Project included **design, manufacturing, delivery, installation, testing and commissioning** of the:

- 110 kV outdoor switchgear for transformer TR 3 bay (circuit breaker, disconnector, CTs, VTs, transformer neutral CT, surge arresters)
- 36 kV gas-insulated switchgear SE CBGS-0
- Substation control system (BCU SE Micom C264) and Telecom
- Relay protection (SE Micom P132, P632, P139, P445, P991) and automatic voltage controller
- Integration in local RTU and in central SCADA/EMS of KOSTT
- Substation metering system and integration in KOSTT AMR System
- Auxiliary service supply system (SE circuit breaker, MCB and materials)
- Training for SCS (SE BCU), SE protection relays and metering system
- Civil works on the foundations of power transformer, HV and MV equipment, outdoor and indoor cable channels, road and substation gate,
- Mechanical works on the support structures for HV and MV equipment, cable trays, transformer oil pit fire protection covers
- Installation and commissioning of oil separator

During the implementation Komtel have trained authorized staff of Kelkos and final beneficiary (KOSTT) and offered continuous technical support during the warranty period.

The engagement of Komtel’s staff on the implementation of the project was correct and professional as well as the cooperation with Kelkos and KOSTT’s staff.

Based on previous, we can recommend to all interested parties company Komtel Project Engineering as company devoted to work, quality and satisfaction of customer’s requirements.
